DETAILED SYLLABUS

Introduction of basic concepts of DM: Types of disasters and causes, prevention, Vulnerability profile of country (concept, Hazards, Vulnerability, and Risk & Capacity) and mitigation process. Disaster phases and nature of resilient community. Disaster Preparedness: Disaster preparedness measures, preparedness plan, early warning system, emergency centers & shelter, co-ordination at local level. Earthquake & Safety: Safety procedures to be followed before, during and after earthquake. Utifting & stabilizing load: Lever, its types, methods of lifting and stabilizing. O6	S.	Subject	No. of
and causes, prevention, Vulnerability profile of country (concept, Hazards, Vulnerability, and Risk & Capacity) and mitigation process. Disaster phases and nature of resilient community. 2 Disaster Preparedness: Disaster preparedness measures, preparedness plan, early warning system, emergency centers & shelter, co-ordination at local level. 3 Earthquake & Safety: Safety procedures to be followed before, during and after earthquake. 4 Lifting & stabilizing load: Lever, its types, methods of lifting and stabilizing. 5 Basic Search & Rescue: Technique to remove surface victims. 6 Fire Safety: Elements of fire, Classes, Methods of Extinguishing. Types of Fire and Response. 7 Flood/Lightening/Thundering/Drought: Types and Response, preparation of local life saving devices. Lightning vs thundering/ thunderstorm, what to do before thundering/ thunderstorm, protection from a thundering/ thunderstorm or Lightning? Lightning safety tips inside/ outside the home. Thundering/ thunderstorm is likely to your area. What to do during & after thundering/ thunderstorm. Definition of Drought, causes, Effects, Mitigation. 8 Community Based First Aid: scene security, physical examination, identification of life-threatening problems and stabilization & care of the victims. 9 BLS& CPR: The respiratory system; Techniques for opening the airway; Rescue breathing; FBAO Management and CPR 10 Control Bleeding & Wound Care: Improvised methods of control bleeding. 11 Musculoskeletal Injuries: Improvised method of splinting 12 Lifting & Moving Patient: Methods for correct lifting; Correct posture, Handling neck and spinal injuries, improvised stretcher with local resources. 13 Snake Bites & Animal Bites: Snake bite, Scorpion bite, Bee bite, Animals (Dog/Cat etc) bites & their care & PHT	No.	_	Sessions
measures, preparedness plan, early warning system, emergency centers & shelter, co-ordination at local level. 3 Earthquake & Safety: Safety procedures to be followed before, during and after earthquake. 4 Lifting & stabilizing load: Lever, its types, methods of lifting and stabilizing. 5 Basic Search & Rescue: Technique to remove surface victims. 6 Fire Safety: Elements of fire, Classes, Methods of Extinguishing. Types of Fire and Response. 7 Flood/Lightening/Thundering/Drought: Types and Response, preparation of local life saving devices. Lightning vs thundering/ thunderstorm, what to do before thundering/ thunderstorm, protection from a thundering/ thunderstorm or Lightning? Lightning safety tips inside/ outside the home. Thundering/ thunderstorm is likely to your area. What to do during & after thundering/ thunderstorm.
